Continuation of Disposition of Claims: Claims subject to restriction and/or election requirement are 1,2,5-13,17,18,20,21,27,30-33,35,38,39,41,43 and 50-52.

Art Unit: 1773

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 5-13, 17-18, 20-21, 27, 30-33, 35, 38-39, 41 and 43, drawn to a device.

Group II, claim(s) 50, drawn to an imaging method.

Group III, claim(s) 51, drawn to an optical scanner.

Group IV, claim(s) 52, drawn to detecting method.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the single common feature linking the inventions is a solid radiation sensitive device for monitoring radiation dose comprising at least one radiation sensitive material in a polymeric binder as in Claim 1. However, this general inventive concept is not novel and is disclosed in WO9621885 as noted on the international search report and in the preliminary examination report.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species of the radiation sensitive material are as follows:

A. A diacetylene

B. A radiochromic dye

C. A pH sensitive dye

D. A leuco dye

E. A carbinol dye

Art Unit: 1773

F. A radiation sensitive complex

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP

§ 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Species A – Claims 1, 2, 5, 6, 12-13, 17-18, 20-21, 27, 30-33, 35, 38-39, 41, 43
Species B – Claims 1, 2, 5, 7, 12-13, 17-18, 20-21, 27, 30-33, 35, 38-39, 41, 43
Species C – Claims 1, 2, 5, 10, 12-13, 17-18, 20-21, 27, 30-33, 35, 38-39, 41, 43
Species D – Claims 1, 2, 5, 8, 12-13, 17-18, 20-21, 27, 30-33, 35, 38-39, 41, 43
Species E – Claims 1, 2, 5, 9, 12-13, 17-18, 20-21, 27, 30-33, 35, 38-39, 41, 43
Species F – Claims 1, 2, 5, 7, 11-13, 17-18, 20-21, 27, 30-33, 35, 38-39, 41, 43

The following claim(s) are generic: 1, 2, 5, 12-13, 17-18, 20-21, 27, 30-33, 35, 38-39, 41, and 43

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the single common feature linking the inventions is a solid radiation sensitive device for monitoring radiation dose comprising at least one radiation sensitive material in a polymeric binder as in Claim 1. However, this general inventive concept is not novel and is disclosed in WO9621885 as noted on the international search report and in the preliminary examination report, wherein acetylene is used as the radiation sensitive material.

Art Unit: 1773

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monique R. Jackson whose telephone number is 571-272-1508. The examiner can normally be reached on Mondays-Thursdays, 8:00AM-4:30PM.
